Immediate Attention Emergency Numbers

- Police Phone: 110
- Rescue service and fire brigade / Rettungsdienst und Feuerwehr Phone: 112
- Medical on-call service / Ärztlicher Bereitschaftsdienst Phone: 116117
- Emergency poison control centers (Bayern) Phone: 089 19240
- Pharmacy emergency call Phone: 0800 0022833 (free of charge) / Mobile: 22833 (69 Cent/Minute)

When do you call the emergency services?

Phone: 112 (equivalent to 911 in USA/MX/CA) (144 in CH/AT, 999 UAE)

With the number 112, you can call the ambulance service. It is reserved for acute or possibly even life-threatening emergencies. These include, among others:

- Signs of a heart attack (severe chest pain, shortness of breath, cold sweats),
- Signs of a stroke (visual and speech disorders, paralysis),
- Accidents with serious injuries/high blood loss,
- Powerlessness/unconsciousness,
- Allergic shock (anaphylaxis),
- Intense pain,
- Severe burns,
- Asthma attack (sudden shortness of breath).

If you are not sure whether the condition is or could become life-threatening, dial 112!

The emergency call expert on the phone decides which emergency vehicle is needed for which case and whether an emergency doctor should be on board. In principle however, an ambulance is sent to the scene in almost every emergency.

Disclaimer:

This document is meant to help you but is not meant to be recommending a specific organization. We are just providing you with the information that can possibly help you find the right contact for your specific situation.

If there is no acute emergency, but the person concerned needs transport to the nearest hospital and cannot drive himself, the emergency service center will send an ambulance. If it is medically necessary, the health insurance company will cover the costs of the ambulance and the patient transport.

When do you call the medical on-call service?

Phone: 116117

In urgent but not life-threatening cases, you dial 116117 - the nationwide number for on-call service, also known as emergency service. This is the on-call centre for the on-call medical service, which will direct you to on-call practices that you can visit if necessary. In some cases, a doctor on call will come to your home if your health does not allow you to go to a doctor.

The medical on-call service provides care for both statutory and private patients, and the costs are covered.

Pharmacy emergency call Phone: 0800 0022833 / Mobile: 22833

If you need urgent medication during the night, at the weekend or on a holiday, you can call the pharmacy emergency number to find out which pharmacy is open in your area.

Covid-19 related information's and important contacts. (10.01.2022)

Disclaimer: Information regarding the global Covid-19 pandemic are constantly changing please take special care of the social distancing measures, and directions given by your local authorities. Keep in mind, that the following information might change constantly and might not be completely accurate at to point it reaches you. The use of the following information's are responsibility of the user, the university so as its staff are not responsible for the accurateness and information's actuality of the following information's.

Please inform the university about positive covid-19 test results

Current information by Landkreis Rottal-Inn regarding Covid-19 / Contact to Health Office

Disclaimer:

This document is meant to help you but is not meant to be recommending a specific organization. We are just providing you with the information that can possibly help you find the right contact for your specific situation.

the contact information of the health office Pfarrkirchen can be reached from Monday to Thursday between 08:00 and 16:00 o'clock and Friday between 08:00 and 13:00 o'clock by phone at 08561/20-497.

On weekends, the contact tracing service cannot be reached by telephone.

You can also send your request by e-mail to **kontaktermittlung@rottal-inn.de**

Note:

The use of the above-mentioned extension or the e-mail address from the contact determination serves for the clarification of questions with positively tested persons, with contact persons to positively tested persons, for the notification of travel returnees incl. negative findings, transmission for the purpose of ending the quarantine in accordance with the valid general decree on the entry quarantine regulation and for the allocation of appointments for a test at the test center Pfarrkirchen, if no independent online reservation via the homepage of the district Rottal-Inn is possible.

We ask you **not to block the lines unnecessarily regarding the request of your outstanding results**. When using the Bavarian test offer, the results will be sent directly to your specified e-mail address from the online reservation or, in the case of contact persons of category I, a telephone message will be sent as soon as possible by the contact determination staff after receipt of the results.

Information for travel returnees in the district of Rottal-Inn

For persons who have been in a **virus variant area or high-risk** area within ten days prior to entry, the **obligation to register** and the obligation to have current proof of testing upon

6

Disclaimer:

This document is meant to help you but is not meant to be recommending a specific organization. We are just providing you with the information that can possibly help you find the right contact for your specific situation.

entry apply without any exception. The **Andorra, Angola, Egypt, Argentina, Ethiopia, Australia, Bahamas, Baharin, Barbados, Belarus, Belgium, Belize, Bolivia, Botswana, Burundi, Cabo Verde, Denmark, Dominica, Estonia, Finland, France, Gabon, Georgia, Ghana, Grenada, Greece, Guinea, Haiti, Ireland, Island, Israel, Italia, Jamaica, Yemen, Jordania, Kameron, Canada, Qatar, Kenia, Congo, Korea, Croatia, Kuwait, Laos, Lesotho, Lebanon, Libya, Liechtenstein, Luxembourg, Leetonia, Liechtenstein, Malawi, Mali, Malta, Mauritius, Mexico, Monaco, Mozambique, Namibia, Netherlands (oversea regions), Nigeria, Norway, Panama, Papua new guinea, Poland, Portugal, Philippines, Rwanda, Russia, Zambia, San Marino, Sweden, Switzerland, Seychelles, Sierra Leona, Zimbabwe, Slovenia, Spain, Sudan, South Africa, South Sudan, Syria, Tadzhiakistan, Tanzania, Togo, Trinidad and Tobago, Turkey, Check Republic Turkmenistan, Uganda, Hungary, Uruguay, Venezuela, United Arab Emirates, United Kingdom, USA, Vietnam, Cyprus** have been designated as high risk areas.

Virus Variant Areas:

There are currently no virus variant areas

For persons who have been in a **virus variant area or high-risk** area within ten days prior to entry, the **obligation to register** and the obligation to have current proof of testing upon entry apply without any exception. Returnees coming who have been in a risk area in the previous 14 days are obligated to quarantine 14days regardless of their vaccination status:

For more information visit the following link:

https://www.rki.de/DE/Content/InfAZ/N/Neuartiges_Coronavirus/Risikogebiete_neu.html

Persons (unvaccinated) who enter the Free State of Bavaria and who have stayed in a risk area within 14 days prior to entry are obliged to go directly to their own apartment or other suitable accommodation immediately after entry and to stay there permanently for a period of 10 days after entry. These persons are not permitted to receive visits from persons who do not belong to their household during this period. These applies also for vaccinated individuals coming from variant areas.

Quarantine, test or nothing? On the Web:

<https://www.eqv-check.bayern/>

of the Bavarian Ministry of Health, these questions can be answered with a few clicks.

Disclaimer:

This document is meant to help you but is not meant to be recommending a specific organization. We are just providing you with the information that can possibly help you find the right contact for your specific situation.

High risk area:

Isolation period 10 days.

Ends for recovered/vaccinated persons if they submit the corresponding proof to the responsible KVB via the entry portal or by other means. For all other persons, quarantine can be ended by means of a test, which can be carried out on the fifth day after entry at the earliest. Quarantine ends with the transmission of the negative test certificate.

A registration on

<https://www.einreiseanmeldung.de>

has to be made. A test must be presented that was carried out at the earliest 48 hours before entry or at the latest 48 hours after entry. This test has to be presented to the district administration within 72h after entry via e-mail: einreise@rottal-inn.de.

Exemption from quarantine for fully vaccinated persons and recovered persons.

According to § 4 para. 1, 2 sentence 1 of the CoronaEinreiseV (replaces the EQV), one is in principle subject to the 10-day segregation after entry from a normal risk area. Persons who are considered to be recovered or fully vaccinated are not subject to this obligation if the corresponding proof is transmitted to the competent authority via the portal www.einreiseanmeldung.de. The segregation ends only when the proof is sent. If the proof is sent before entry into the country, the person is not subject to segregation at all. The same applies to tested persons in this case. The test must not exceed 48 hours. (antigen rapid test) or 72 hrs. (PCR-, PoC-PCR-Test) before entry.

Recovered, tested and vaccinated persons must also be asymptomatic.

In the case of re-entry from a high incidence area, free testing from isolation can occur no earlier than the fifth day after entry. Again, segregation does not end until the detection is transmitted.

For virus variant areas, one is subject to the 14-day segregation. There are no special regulations for vaccinated/recovered persons. It is not possible to shorten the isolation period.

Accepted Vaccination in the EU:

-BioNTech / Pfizer

8

Disclaimer:

This document is meant to help you but is not meant to be recommending a specific organization. We are just providing you with the information that can possibly help you find the right contact for your specific situation.

- Only 14 days after completion of the second dosage.
- Booster is recommended after 3 Months

-Moderna

- Only 14 days after completion of the second dosage.
- Booster is recommended

-AstraZeneca

- Only 14 days after completion of the second dosage.
- Booster is recommended

-Johnson & Johnson / Janssen Pharmaceuticals

- Only 14 days after completion first dosage. An extra dosage with BioNTech/Pfizer is recommended but no obligatory

In Process of acceptance (currently not accepted):

-CureVac

-Sanofi-GSK

-Novavax

Link:

https://ec.europa.eu/info/live-work-travel-eu/coronavirus-response/safe-covid-19-vaccines-europeans_de

The contact office must be **informed** immediately if symptoms occur during the quarantine period: 08561 20-49

You are obliged to contact the district administrative authority responsible for them without delay (= contact determination of the health office Pfarrkirchen; Tel.: 08561/20-497; Email: kontaktermittlung@rottal-inn.de) and to inform them about your return from a risk area.

In case of symptoms that indicate a Covid-19 disease, these persons are obliged to immediately inform the contact tracing service at the district administrative office.

The notification (e.g. email) to the district administrative office responsible for you should include the following information:

Surname, first name, address, telephone, cell phone, email, origin from which risk area, period of stay in the risk area, means of transport used upon entry, information whether symptoms (fever, respiratory distress, cough, odor or taste disorders, other) are present

Risk area is a state or region outside of Germany for which there is an increased risk of infection with the coronavirus SARS-CoV-2 at the time of entry into Germany; the latest publication of the RKI:

Disclaimer:

This document is meant to help you but is not meant to be recommending a specific organization. We are just providing you with the information that can possibly help you find the right contact for your specific situation.

(https://www.rki.de/DE/Content/InfAZ/N/Neuartiges_Coronavirus/Risikogebiete_neu.html)
on the classification as a risk area is decisive.

Quarantine duration and interruptions:

Basically: 10 days (in case you are free of symptoms and had any contact to a infected patient)

Interruption: only for the execution of a test (exception previous appointment is required)

Shortening: Quarantine can be shortened to 5 days.

- Requirements: negative test result, no symptoms of disease

Obligation: Consult a doctor or test center if symptoms of illness occur within 10 days

Persons who are able to present a negative result in German or English to the District Office are exempt from the quarantine obligation.

The validity of the negative result has two conditions:

Smear test at most 48 hours before entry

Molecular biological testing in an approved country (according to RKI, see link)

https://www.rki.de/DE/Content/InfAZ/N/Neuartiges_Coronavirus/Tests.html

If a medical certificate (negative result) is submitted to the responsible district administrative authority after the 5 day of quarantine (5 days after entry), the obligation of the 10-day domestic quarantine ends. The contact person of the health office Pfarrkirchen will confirm the receipt of the negative result either verbally or in writing and will actively inform you about the end of your quarantine obligation. The medical certificate must be kept for at least 10 days after entry.

Please look at the following link for extra information regarding quarantine exceptions:

<https://www.gesetze-bayern.de/Content/Document/BayEQV-2?AspxAutoDetectCookieSupport=1>

Special rules for Pfarrkirchen and the Free State of Bavaria.

- Ban on alcohol in some public places:

- Compulsory masks in public places: Train and Bus stations, Supermarkets and so on.

- Surgical Masks are sufficient, but a **FFP2** or equivalent (**FFP3, KN95**) is **recommended in** public spaces.

-Contact restrictions

10

Disclaimer:

This document is meant to help you but is not meant to be recommending a specific organization. We are just providing you with the information that can possibly help you find the right contact for your specific situation.

- Corona rules in Bavaria according to the traffic light level in the hospital system.
 - **Green:**
 - No contact restrictions
 - Medical mask (no FFP2 mask requirement).
 - Events are unrestricted outdoors, but 3G applies above an incidence of 35
 - No restrictions in body-related services, sports facilities and gyms - but 3G applies above an incidence of 35
 - In nursing homes, the 3G rule applies regardless of incidence
 - In zoos, cultural and leisure facilities, the 3G rule applies from 35, before which there are no restrictions
 - Gastronomy also has the 3G rule from an incidence of 35, not before
 - **Yellow:** The extent to which the Corona rules will be tightened if the incidence of hospitalization and new infections increases - and the traffic light is on yellow or red - has not yet been determined for Bavaria. In general, however, it is likely that the 3G rule will apply in more areas and that restrictions will come.
 - **Red:**
 - Contact restrictions still apply to the unvaccinated: unvaccinated and convalescents may only meet with members of their own household and a maximum of two members of another household. Children under 12 years and 3 months of age belonging to these households and the vaccinated and convalescent are disregarded for the total. Spouses, domestic partners, and partners in a non-marital partnership are considered one household, even if they do not share a residence.
 - Catering establishments can reopen - the 2G regulation applies (also in outdoor areas, e.g. at mulled wine stands), and there is also a curfew from 10 pm to 5 am. The FFP2 mask requirement still applies, except in the square. The operation of pure pubs remains prohibited.
 - The tourist operation of lodging establishments is also permitted again, and the 2G regulation applies here as well.
 - The operation/use of sports facilities, gyms, swimming pools dance schools are allowed again from Wednesday, but the 2Gplus rule applies. This means that only vaccinated and recovered people have access and they must have a negative Corona test. This can be a self-test on site

Disclaimer:

This document is meant to help you but is not meant to be recommending a specific organization. We are just providing you with the information that can possibly help you find the right contact for your specific situation.

under the supervision of the person in charge, a rapid test (max. 24 hours old) or a PCR test.

- In leisure facilities such as theaters, cinemas, museums or zoos, and at events, 2Gplus applies! Here, too, a daily negative corona test is required for admission (self-test on site under supervision, rapid test or PCR test).
- In addition to barbering, other non-medical or non-therapeutic body-related services such as beauty salons, nail care and tattoo parlors are now allowed again, and the 2G rule applies here.
- Extracurricular educational services, vocational training, continuing education, music schools, driving schools and adult education services are again permitted in presence with 2G.
- Universities (presence), libraries and archives can reopen with 2G. Exception: a PCR test is sufficient for taking exams at universities.
- The ban on events or the closure of facilities and operations that were previously subject to 2G or 2Gplus will be lifted. However, the stricter 2G or 2Gplus regulations that apply throughout Bavaria will remain in place.
- The access restrictions for retail stores will be relaxed from 20m²/customer to 10m² per customer.

Current state RED

What does 3G mean?

Geimpft / Vaccinated:

Full vaccination protection is assumed when persons have been vaccinated with a vaccine licensed in the European Union and at least 14 days have passed since the final vaccination.

For the Biontech, Astrazeneca and Moderna vaccines, two doses of vaccine are required. For the Johnson & Johnson vaccine, only one vaccine dose is required.

Anyone who has had a Corona infection through a proven PCR test and has received a single vaccination dose ("booster vaccination"), since which at least 14 days have passed, is also considered to have been vaccinated.

Proof of vaccination is required in English, French, German, Italian or Spanish or in an electronic document.

Genesen /Convalescent:

Convalescents require proof of the presence of a previous Covid 19 infection at least 28 days and no more than six months ago.

The proof must show the result of a personalised PCR test or rapid antigen test in English, French, German, Italian or Spanish.

A certificate of segregation from the public health department, for example, also counts as proof.

Getestet / Tested:

Tested persons require a personalised, negative PCR test or rapid antigen test, the swab of which must have been taken, for example, a maximum of 24 hours or 48 hours ago, depending on the requirement of the control time.

Corona rapid tests in the district of Rottal-Inn

For a rapid antigen test at the four rapid test stations in Pfarrkirchen, Eggenfelden, and Simbach am Inn, an appointment must be booked in advance at www.novidatest.de

Disclaimer:

This document is meant to help you but is not meant to be recommending a specific organization. We are just providing you with the information that can possibly help you find the right contact for your specific situation.

Appointments can only be made 5 days in advance (location selection when booking appointment)!

Men Shelter

What is a men's shelter?

How does it "work" there?

In an anonymous men's shelter, men find shelter and protection for a limited time, possibly also with their child or children. Our offer is aimed at men of full age who are affected by domestic violence (physical as well as psychological), violence in their social environment (workplace, family and circle of friends etc.) as well as sexual and sexualized violence, and other kinds of violence.

Victims Service (If you are a victim of injustice, violence or crime)

Weißer Ring e.V.

Assistance and counselling for victims of crimes

Important Insurances in Germany besides the Health Insurance (Liability & Legal Protection)

In addition to health insurance, which is mandatory for studying in Germany, it can also be useful to take out liability and a legal protection insurance.

What is liability insurance?

In Germany, there is a law that states that everyone is liable for the damage they cause to others. The person causing the damage is liable with his salary, his savings or even his property. Liability insurance covers such damages as long as they are not caused willfully

What is a legal protection insurance?

Your reliable back-up in the event of legal disputes. For example, if you are in a dispute with your landlord, boss or accident opponent.
