

Tuberculosis Report

In reference to several tuberculosis infections in the past we would like to inform you about some important details concerning the application and enrollment of students at Deggendorf Institute of Technology (DIT).

German health insurance companies **DO NOT** cover the costs of medical treatment of tuberculosis or other infectious diseases that were brought into Germany from the students' home countries. In case of an infection students not only have to suffer from the dangerous disease but also have to bear the financial risk of medical treatment in Germany. Medical costs are very high and generally cannot be beared by a student.

German health insurance companies ask for proof that students do not suffer of tuberculosis or any other infectious disease. If a German health insurance company refuses to insure a student said student will be expelled from DIT and will have to return home immediately.

Please have a licensed doctor sign this paper in order to confirm that you do not suffer from tuberculosis or any other infectious disease.

I hereby confirm that my patient _____ (name) does not suffer from tuberculosis or any other infectious disease.
