Organize yourself! aims to develop and strengthen the *time management skills* of *young students* through their *own learning process*, by the use of different tools and approaches that are part of the project. Working material and information will be provided not only to the students, but also their *professors and teachers*, as well as other people in their *family- and social-life*, to give them new ideas and guide them on how to support young people managing their time.
PROJECT: ORGANIZE YOURSELF!
